

## **RON DUNNING**

I became an incomplete C4 following an accident when I fractured my neck in 2016. I am an unsteady walker with limited hand function.

Before my injury I had a 29-year career in Senior Management with Barclays Bank in Central London before taking redundancy. Then I started a second career in the YMCA movement across London and Home Counties. My last role prior to my injury was as Director of Housing and Community Services for Hertfordshire and Buckinghamshire where I was responsible for the organisations Housing Hostels with over 500 beds for single homeless people and our wider youth and community services.

I have been a Trustee and Honorary Treasurer of several local and national organisations including a School Governor. I am passionate about helping people develop their potential whatever their background and especially young people and the disadvantaged. Outside work I am interested in business and current affairs as well as an avid follower of sport but especially football and rugby.

I have been a member of SIA since just after my injury in 2016 and have always valued the support given to me and the wider spinal injured community. I feel that SIA is an invaluable organisation doing great work and has an exciting vision to develop and enhance the work it does to support the spinal cord injured community along with providing a stronger representation to government, clinical commissioning groups and NHS.

I bring a wide range of business and financial skills and experience to my position as Honorary Treasurer and Trustee of the organisation and look forward to serving our community during my term in office.
