

TRAINING

We offer range of virtual and face to face education and training for health and social care professionals, giving an insight into the complex and sometimes unique issues that affect people living with spinal cord injury (SCI). Each module is chargeable, and all our sessions are CPD (Continuing Professional Development) certified. Contact the academy team or visit our website for more information

MANAGING THE CLINICAL CHALLENGES OF SCI

Virtual conference for healthcare professionals

Offering healthcare professionals a focused, half day of expert insight into key topics. Delegates can submit unlimited questions throughout the event, with speakers addressing them in a dedicated Q&A session. A ticket also includes full on-demand access, making it easy to revisit sessions or catch up at a time that suits your schedule. Stay informed. Strengthen your practice. Enhance the support you provide to people living with SCI.

RESEARCH AND DEVELOPMENT

The research we support engages the SCI community directly, and helps improve our understanding of all things SCI, from pressure ulcer risk factors to assistive technology. Research is the cornerstone of understanding ways in which we can ensure quality of life after SCI, and the Frank Williams Academy is dedicated to bringing together vital specialist expertise across the health and care sector.

SPOTLIGHT EVENTS

Free online evening sessions for people living with spinal cord injury

Free online evening sessions for people living with SCI. Spotlight Events are live, online webinars created for our members and those who support them. Each session shines a light on a key topic in SCI featuring expert speakers, panel discussions and practical insights that help people better understand and manage life after injury. They offer an easy way to signpost patients to trusted information. Sessions for healthcare professionals will be launched later in the year

SCI KNOWLEDGE HUB

Essential spinal cord injury knowledge for people living with SCI.

Provides members with access to clear, trusted information on every aspect of life after SCI. Designed to support people living with SCI in understanding the physical and emotional changes that follow injury, the Hub helps them rebuild confidence and shape a fulfilling life. Healthcare professionals can benefit too, by being aware of the Hub and signposting patients to reliable, easy to understand information that reinforces clinical guidance and supports better long term outcomes.

'WHAT MATTERS?' SURVEY

SIA's annual, UK-wide survey, capturing the real priorities and challenges of people living with SCI. We ask what support is needed, what we should fight for and what truly matters to the SCI community. Healthcare professionals can make a real impact by sharing the survey with patients and encouraging participation.
